Mani Poorna Rao Amalapuram

Full Stack Developer

ndmprao2001@gmail.com | +91 8332997714 | Bengaluru, India | linkedin.com/in/mani-poorna-801365236/

PROFILE

Dynamic and results-oriented Full Stack Engineer with 2 years of experience specializing in Java-based technologies, including Spring Boot for backend development and React.js for frontend applications. Recognized for adaptability, attention to detail, and innovative problem-solving, excelling at building scalable, high-performance web applications that align with modern development standards and business objectives.

WORK EXPERIENCE

Project Engineer, Elfonze Technologies 04/2024 – Present | Bengaluru

- Collaborated with cross-functional UI/UX teams and clients to deliver user-centric interfaces using **React.js**, improving customer experience and aligning solutions with business objectives.
- Contributed actively in Agile ceremonies, mentoring peers and strengthening team performance while working on **Spring Boot-based applications** in a continuous integration environment.
- Applied strategic thinking to optimize system architecture, including multi-port handling and scalable backend design using **Spring Boot and PostgreSQL**, aligning infrastructure with long-term business goals.
- Developed high-performance frontend applications using **React.js and Redux**, integrating seamlessly with **Spring Boot REST APIs**, and implemented lazy loading and code splitting to achieve Lighthouse scores of 95+.
- Implemented secure authentication and authorization using **Spring Security (JWT, RBAC)** and presented technical solutions to stakeholders to improve both system security and user experience.
- Actively participated in retrospectives, improving collaboration and delivery efficiency across **full-stack applications (React + Spring Boot + PostgreSQL)**.

SKILLS

Languages:	Java 8/11, JavaScript ES6+, SQL, HTML5, CSS3
Backend Frameworks:	Spring Boot, Spring MVC, JPA/Hibernate, RESTful API Development
Frontend Technologies:	React.js, Redux, JavaScript, Tailwind, Bootstrap
Databases & Data:	MySQL, PostgreSQL

PROJECTS

Enterprise POS Platform (React.js, Spring Boot)

- Built a scalable **multi-tenant POS SaaS platform** using **Spring Boot (backend)** and **React.js (frontend)**, implementing tenant onboarding, secure authentication, role-based access control (Admin/Staff), product & order management, and **real-time** cart synchronization with dynamic pricing, tax, and discount engines.
- Designed and integrated robust backend services including billing, payments, inventory tracking, and reporting modules with **RESTful APIs**, caching strategies, and audit logging, ensuring high performance and data isolation across tenants.

Asset Tracking & Audit Management System (React.js, Spring Boot)

- Developed a **multi-tenant asset tracking SaaS platform** using **Spring Boot, Spring Security, PostgreSQL, and React.js**, enabling super admins to onboard tenants, manage teams, and support bulk asset ingestion via CSV/Excel uploads with efficient data persistence and validation workflows.
- Implemented an end-to-end asset auditing system with **QR code generation and scanning**, allowing real-time asset verification, status tracking, and audit completion, improving operational accuracy and streamlining asset management processes.

EDUCATION

Ideal Institute of Technology — Bachelor of Engineering 06/2019 – 04/2023 | Kakinada, AP, India
